

Medicare Eligible Chronic Care Management

If you have Medicare and live with two or more chronic conditions like arthritis, diabetes, depression, or high blood pressure, chronic care management services can help connect the dots so you can spend more time doing what you love.

SERVICES MAY INCLUDE:

- At least 20 minutes a month of chronic care management services.
- Personalized assistance from a dedicated health care professional who will work with you to create your care plan.
- Coordination of care between your pharmacy, specialists, testing centers, hospitals, and more.
- Phone check-ins between visits to keep you on track.
- 24/7 emergency access to a health care professional
- Expert assistance with setting and meeting your health goals

Ask your doctor about chronic care management services and get the connected care you need.

COMMUNITY CARE SERVICES

Signify Health ACO

*Sakakawea Medical Center,
Coal Country Community Health Center,
& Knife River Care Center*

Visiting Nurse Services

Services available for any patient who is permanently or temporarily confined to his or her place of residence because of a medical or health condition. Skilled nursing services include:

- Help managing your medications
- Care coordination
- Assist with managing symptoms related to acute or chronic illness
- Catheter cares
- Wound care
- IV hydration
- IV medication administration
- Home safety screening
- Referrals for home and community-based services as deemed appropriate (including PT and OT)

Palliative Care

Palliative care is specialized medical care for people living with a serious illness. This type of care is focused on relief from the symptoms and stress of a serious illness. The goal is to improve quality of life for both the patient and the family. It is appropriate for any age at any stage of illness and can be provided along with curative treatment.

Hospice

Hospice is a program of care and support for patients and families coping with terminal illness. Our program is designed to enhance and expand the existing support system of the family. With the assistance of hospice, families are able to be closer to their loved one and assist with more of the necessary care. The program advocates home care, with pain management and symptom control, enabling the patient to have the best quality of life possible within their disease limits.
